DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hasegawa et al. (GB 2303632 A) for the reasons adequately set forth from paragraph 2 of the office action of October 6, 2006.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1713

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims 5, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa et al. (GB 2303632 A) in view of Tsuda et al. (US 6,541,552 B1) for the reasons adequately set forth from paragraph 4 of the office action of October 6, 2006.

Response to Arguments

5. Applicant's arguments filed January 8, 2007 have been fully considered but they are not persuasive.

Applicants argue that all the components (a-d) as disclosed in Hasegawa et al. can copolymerize to form a random copolymer comprising components (a-d). However, the examiner disagrees. Applicants fail to recognize that the component c of Hasegawa et al. is not a vinylic monomer as argued. Instead, component c is a polymeric material by itself.

Regarding applicants' argument that the composition of Hasegawa et al. contains a radically polymerizable anionic or cationic surfactant, applicants must recognize that the claims as written do not exclude an ionic surfactant that is polymerizable.

Regarding applicants' argument that Hasegawa et al. only disclose a random copolymer comprising a vinyl monomer and an alkoxysilane containing a radical-polymerizable group and do not disclose "the polyoxyalkylene polymer containing at least one reactive silyl group at a molecular chain terminus" as claimed. However, applicants must recognize that because the copolymer containing (a) and (b) is prepared with free radical initiator, which typically will result a random copolymer product, the examiner has a reasonable basis that the random nature of the copolymerization will result a copolymer having "at least one silyl group at a molecular chain terminus". Therefore, the examiner has a reasonable basis the claimed "a polyoxyalkylene polymer containing at least one silyl group at a molecular chain terminus" is inherently possessed in the copolymer of Hasegawa et al. Since the PTO does not have proper means to conduct experiments, the burden of proof is now shifted to applicants to show otherwise. *In re Best*, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977); *In re Fitzgerald*, 205 USPQ 594 (CCPA 1980).

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
